# Bright Spot Gardens

SPRING  
1938

Valentine's Corner, Chartley, Mass.

BRIGHT :: SPC. :: GARDENS

---

*To My Old and New Customers:*

Because of a large surplus of my 1937 catalogues, and few changes in offerings for the current year, I am not issuing a new list for 1938. If you have mislaid your last year's list I will send you another upon application. Telephone Attleboro 464-J-2.

Come and look over the Garden. You will find some interesting additions to my hardy plant list. Also stocks of those items of which I sold out last year have been replenished. I trust no one will be disappointed in finding wanted sorts.

May I impress upon old and new customers that early orders for annuals insure your getting what you want in the best possible condition of growth, boxed separately, and ready in late May.

CORA A. JENKS

Valentine's Corner,  
Chartley, Mass.

## HARDY PERENNIAL PLANTS

---

All Hardy Plants are offered subject to possible crop failure, due to abnormal weather conditions during the past winter.

Under this heading are listed all my hardy plants, suitable for any garden purpose. Many of the taller sorts may be used effectively to vary the plantings of lower varieties in the rock garden, or supply background, as well as in the mixed border, while many of the so-called rock plants are valuable in the front of the border or as edgings.

Rock plants are marked \*.

All plants herein listed are priced at 25 cents each unless otherwise noted.

---

### ACHILLEA PTARMICA.

THE PEARL—White, double flowers, from midsummer on. 24 inches.

### ACONITUM (*Monkshood*).
